

## **Nationalism and Multi-Level Governance**

SPS Workshop, May 30-31, 2008

Seminar Room 2

Organized by Jaime Lluch and Dejan Stjepanovic

please register with Liz Webb (Liz.Webb@eui.eu)

This workshop aims to understand the political dilemmas presented by sub-state nationalist movements within states with multi-level systems of governance. We are interested in exploring both the nature of the nationalist actors involved, i.e., the political parties and social movements that identify as “nationalist” or “national,” and the varieties of institutional responses that are usually formulated to accommodate the sub-state nationalist demands of these actors. With respect to the institutional responses, the workshop will explore the theory and practice of actually-existing autonomy and federal arrangements in Europe and the Americas, etc. In regards to the nationalist actors, the workshop will deepen the participants’ understanding of the interaction between majorities and minorities in plurinational states with multi-level political systems, and the varieties of nationalisms that tend to evolve in these polities.
